Description: Cynomolgus monkey (*Macaca fascicularis)* CD46C, also known as membrane co-factor protein, a.a. 35 – 285 and 301 – 328 with C-terminal His-tag, expressed in a HEK293 cell expression system. MW = 37 kDa (precursor), 33 kDa (mature). *Note: this protein is expressed with a 34 amino acid signal sequence that is cleaved after secretion and is heavily glycosylated, resulting in a protein that runs at a higher apparent MW.*

Application: Useful for studies of protein function and protein-protein interaction.
