Data Sheet

TYK2 (Tyrosine Kinase 2) Assay Kit

Catalog #79527

DESCRIPTION: Janus kinase (JAK) is a family of intracellular, nonreceptor tyrosine kinases that play an important role in cytokine-mediated signaling. This family includes four protein kinases; Jak1, Jak2, Jak3 and Tyk2. Various studies have suggested that regulation of Jak activity should be a promising approach to combat numerous diseases such as immune deficiencies and cancers. The *TYK2 (Tyrosine Kinase 2) Assay Kit* is designed to measure TYK2 activity for screening and profiling applications using Kinase-Glo® MAX as a detection reagent. The *TYK2 (Tyrosine Kinase 2) Assay Kit* comes in a convenient 96-well format, with enough purified recombinant TYK2 enzyme, TYK2 substrate peptide (IRS-1tide), ATP and kinase assay buffer for 100 enzyme reactions.

COMPONENTS:

Catalog #	Reagent	Amount	Storage	
40285	TYK2	1 µg	-80°C	***Avoid multiple freeze/ thaw cycles!***
79334	5x Kinase assay buffer 1	1.5 ml	-20°C	
79686	ATP (500 µM)	100 µl	-20°C	
79519	10x IRS1-tide	500 µl	-20°C	
79696	96-well plate, white	1	Room Temp.	

MATERIALS OR INSTRUMENTS REQUIRED BUT NOT SUPPLIED:
Kinase-Glo MAX (Promega #V6071)
Dithiothreitol (DTT, 1 M; optional)
Microplate reader capable of reading luminescence
Adjustable micropipettor and sterile tips
30°C incubator

APPLICATIONS: Useful for studying enzyme kinetics and screening small molecular inhibitors for drug discovery and HTS applications.

STABILITY: Up to 6 months when stored as recommended.

ASSAY PROTOCOL:
All samples and controls should be tested in duplicate.

1) Thaw 5x Kinase assay buffer, ATP and 10X IRS1-tide.
(Optional: If desired, add DTT to 5x Kinase assay 1 buffer to make a 10 mM concentration; *e.g.* add 10 µl of 1 M DTT to 1 ml 5x Kinase assay buffer 1)

2) Prepare the master mixture (25 µl per well): N wells x (6 µl 5x Kinase assay buffer 1 + 1 µl ATP (500 µM) + 5 µl 10X IRS1-tide + 13 µl distilled water). Add 25 µl to every well.

	Positive Control	Test Inhibitor	Blank
5x Kinase assay buffer 1	6 µl	6 µl	6 µl
ATP (500 µM)	1 µl	1 µl	1 µl
10X IRS1-tide	5 µl	5 µl	5 µl
Water	13 µl	13 µl	13 µl
Test Inhibitor	–	5 µl	–
Inhibitor Buffer (no inhibitor)	5 µl	–	5 µl
1x Kinase buffer 1	–	–	20 µl
TYK2 (0.25 ng/µl)	20 µl	20 µl	–
Total	50 µl	50 µl	50 µl

3) Add 5 µl of Inhibitor solution to each well labeled as “Test Inhibitor”. For the “Positive Control" and “Blank”, add 5 µl of the same solution without inhibitor (Inhibitor buffer).

4) Prepare 3 ml of 1x Kinase assay buffer 1 by mixing 600 µl of 5x Kinase assay buffer 1 with 2400 µl water. 3 ml of 1x Kinase assay buffer 1 is sufficient for 100 reactions.

5) To the wells designated as "Blank", add 20 µl of 1x Kinase assay buffer.

6) Thaw TYK2 enzyme on ice. Upon first thaw, briefly spin tube containing enzyme to recover full content of the tube. Calculate the amount of TYK2 required for the assay and dilute enzyme to ~0.25 ng/µl with 1x Kinase assay buffer. Store remaining undiluted enzyme in aliquots at -80°C. *Note: TYK2 enzyme is sensitive to freeze/thaw cycles. Avoid multiple freeze/thaw cycles. Do not re-use thawed aliquots or diluted enzyme.*

7) Initiate reaction by adding 20 µl of diluted TYK2 enzyme to the wells designated “Positive Control” and "Test Inhibitor ". Incubate at 30˚C for 40 minutes.

8) Thaw Kinase-Glo Max reagent.

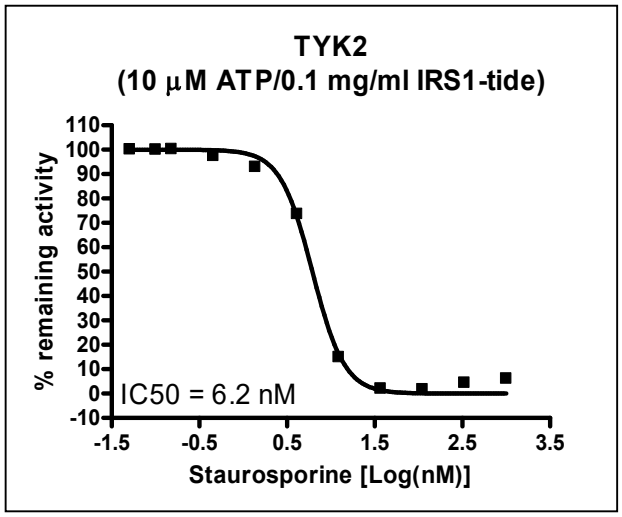
Email: info@bpsbioscience.com

9) After the 40 minute reaction, add 50 µl of Kinase-Glo Max reagent to each well. Cover plate with aluminum foil and incubate the plate at room temperature for 15 minutes.

10) Measure luminescence using the microplate reader.

Example of Assay Results:



Inhibition of TYK2 enzyme by Staurosporine, measured using the *TYK2 (Tyrosine Kinase 2) assay kit* (Cat. #79527). *Data shown is lot-specific. For lot-specific information, please contact BPS Bioscience, Inc. at info@bpsbioscience.com*
